UNIVERSITY OF WISCONSIN

Coronavirus Disease (COVID-19) Exposure Screening Research Subject MRI Day of Scan Questions

Every Research Subject should answer these questions when they come to HERI, either for an MRI Simulator session or an MRI Research Scan.

Date: _____

Participant Name: _____ Participant Number: _____

Research Specialist/Research Lab : _____

Do you have any of the following unexplained symptoms related to respiratory illness?

- Fever (Temperature greater than or equal to 100.0 degrees Fahrenheit)
- Cough
- Shortness of Breath/Chest Tightness
- Runny Nose
- Sore Throat
- Nasal Congestion
- Severe Exhaustion

Yes Answers to any of the above symptoms will mean the Research Subject will not be able to participate in activities in either the HERI Simulator or the HERI MRI on that day.

In addition, every Research Lab must review the latest [Covid Quarantine and Isolation Information Guidance](#) from University Health Services to verify that this particular research subject's presence in the HERI Simulator or the HERI MRI complies with that guidance. If particulars about the research subject's vaccination or booster status are unknown, please follow the most conservative guidance given.
